

# RIIRIS402D Carry out the risk management process (G2)

## What is RIIRIS402D Carry out the risk management process (G2)?

Commonly known as G2, the *RIIRIS402D Carry out the risk management process* program covers the skills and knowledge for participants to effectively conduct risk assessments and facilitate risk workshops i.e. Manage risk across a broad range of topic applications and industry settings.

## Our Solution for You

Both the knowledge and application of Risk Management processes is a fundamental requirement for anyone working in any industry where hazards exist.

Legislation and risk standard guidelines (ISO 31000:2009) prescribe and recommend Risk Assessment Processes for persons in key roles to be trained in their application.

## Pathway to Excellence

The program is appropriate for those working in supervisory and management or technical specialist roles within:

- Civil construction
- Coal mining
- Drilling
- Extractive Industries
- Metaliferous mining
- Exploration
- Oil and Gas
- Energy and Utilities

## Course Structure

The *RIIRIS402D Carry out the risk management process* program provides a nationally recognised unit of competency.

The program leads participants through the processes for identifying hazards; assessing risk; identifying unacceptable risk and potential actions; deciding on, implementing and facilitating corrective control actions; reviewing the implementation and effectiveness of those actions; auditing the Risk Management processes and completing records and reports.

The course is based around ISO31000:2009 Risk Management Principles and Guidelines and uses the Workplace Risk Assessment and Control (WRAC) process as the primary example of a qualitative risk assessment method.

**Duration:** 2 Days

**Facilitation:** Face to face delivery at client site or ASTRA training facility

Options exist for RPL/RCC via Desktop analysis or the G2 Refresher Program.

**Outcome:** Nationally recognised Statement of Attainment.

## Our Facilitators

*RIIRIS402D Carry out the risk management process* is delivered by professionals with qualifications and extensive experience in the management of risk across a broad expanse of industry applications using a wide variety of process tools.
